## PS Performance-Specific Cutters

Lindstrom introduces a specially modified cutter option for hard-wire and exotic alloy applications. Add the **Performance-Specific (PS)** option to any diagonal cutter for a modest charge and enjoy enhanced performance on **platinum** wire and coils, **titanium** wire, coils and mesh, and **stainless steel** wire.

These Lindstrom cutters can be reconditioned for a nominal charge in most cases, making them very cost-effective in comparison to unwieldy carbide insert cutters and expensive alloy tools.

Call your local Lindstrom sales representative to schedule a tool trial today. For specifications and capacity questions call Lindstrom at 714.921.9950.

- Available in Rx Series, 80 Series or EX Series configuration
- Simply add “-PS” to any normal cutter part number for this special modification
- Superior technology allows clean, consistent cuts on medical materials such as stents, filter media and catheters
- Eliminates self-destructive action of carbide blades, which reduces waste and foreign object contamination from chipping
- Minimum order quantity is one piece, reducing acquisition costs for R&D
- Free Targeted Tool Trials through Lindstrom T3 program for product evaluations
