

### **EIS Announces the Acquisition of Light Fabrications Inc.**

January 31, 2012 – Today, EIS acquired the assets of Light Fabrications Inc. Light Fab, founded in Rochester, NY in 1977, is a custom engineered fabricator of flexible materials. They sell primarily to the Medical, Transportation and Electronics Markets in addition to a number of other industrial markets.

Bob Thomas, President and CEO of EIS, stated, “This acquisition is consistent with our strategy to invest in additional fabrication technology and engineering skills that will help us grow in all of the markets we serve. Light Fab is an outstanding company with a terrific reputation for quality and service. We are excited to expand our capabilities in fabrication.”

Jim Cucinelli, President and founder of Light Fab, stated “Joining with the EIS and Fabrico teams creates a broader and deeper engineering solutions resource, to all the sales and marketing folks in the EIS organization. This will enable Light Fab to take a huge step, another challenge, and an exciting chapter in our projected growth and visibility. The combined technical expertise and equipment capabilities for all the flexible materials we both deal in will create a very unique and powerful offering to the marketplace”.

Light Fab will retain their name as a part of Fabrico, a division of EIS and custom converter of flexible materials offering design and manufacturing services from several North American facilities.
