

TargetBlower Model 6202e

Point of Use 5V Ionizing Blower

Simco-Ion Technology Group announces the immediate availability of the TargetBlower Model 6202e 5V Ionizing Blower. Simco-Ion's TargetBlower is available for order via eOrder.

The TargetBlower is an in-tool ionizing blower designed to control static charge in near critical environments. With a $\pm 5V$ or better balance, the Model 6202e meets the requirements for manufacturing Class 0 (Charged Device Model) devices.

Key features for this compact, space saving ionizer include:

- Automatic emitter cleaning system
- Collimated chassis design to direct ionization to the target area
- Factory Monitoring System (FMS) capability to the tool or to a remote location

Part Number	Description	List Price
91-6202e-01	Model 6202e and Power Supply (or tool) Cable	\$525
14-21108	External Power Supply	\$47

Contact your local Simco-Ion sales representative for more information regarding the TargetBlower.

See eOrder for updated TargetBlower lead times. Sales literature and product information including datasheet and launch guide can be found at PartnerLink via <http://ion.com>.
