

Announcing our new 6" Spool Single Box Package

Superior Essex offers their new 6-inch Spool Single Box Package, providing customers with the opportunity to purchase individual 6-inch spools of magnet wire, in addition to their six-spools-per-box packaging.

This new packaging option is available in many cases of different AWG sizes and constructions, beginning January 2012.

Not only does this new packaging offer more choices to customers, but it also provides additional product protection and ease of material handling.

Please contact your EIS sales representative to order.
